

## Overpressure Vacuum Casting Machine Epoxy Resin

Our Product Introduction

for more products please visit us on [jc-transformer.com](http://jc-transformer.com)

### Basic Information

- Place of Origin: China
- Brand Name: JC
- Certification: SGS CE,UL
- Model Number: JC456
- Minimum Order Quantity: 1 pcs
- Price: consult
- Packaging Details: Export standard packaging
- Delivery Time: 5 days
- Payment Terms: L/C, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100pcs/month

### Product Specification

- After-sales Service: One Stop Service
- Warranty: 2 Years
- Movement Way: Combined
- Atomization: Pressure Atomization
- Flow: Parallel Flow
- Heating Mode: Transmission
- Highlight: Overpressure vacuum casting machine, Epoxy Resin Vacuum Casting Machine, vacuum casting machine Epoxy Resin

Our Product

### Product Description

Customerized Vacuum Epoxy Resin Casting Machine for Dry Type Transformers

#### Basic Info.

Model NO.	KCB
Drying Medium	Inactive Gas, Superheated Steam, Effluent Gas, Air

Material Status	Solution, Strap
Operation Pressure	Vacuum

#### Product Description

Operational Method	Continuous	Product Name	Vacuum Casting Equipment
Mixing Bowl	300L	Pouring Pot Size mm	2200X3000
Standard	KCB Series Standard	Turn-Key Projects	One-Step Service
Transport Package	Wooden	Specification	900*900*900
Trademark	JC	Origin	China
HS Code	84292990	Production Capacity	60000PCS/Year

#### My Company:

is a high-tech private enterprise, it has a experienced term, which more than ten years engaged in research and development, design, manufacture and installation of vacuum equipment. Besides, it is not only committed to build high quality brand about vacuum equipment, but it also has products, which are widely used in impregnating, epoxy resin pouring, drying, and note oil processing in some industries (like metal heat treatment, transformer, and transformer device, reactor device, regulator device, high pressure electrical, motor, capacitor, switch and other similar industries).

Relying on strong technical advantages and scale advantages, and it also dedicated itself to develop Vacuum application technology and relative vacuum equipment. Main products are different kinds of vacuum casting equipments, vacuum drying equipment, vacuum impregnation equipment, vacuum oiling device equipment, and vacuum heat treatment equipment.

The most important of this company is product quality, and it strictly follows international quality certification system, implementation of quality policy about creating a Kerry brands, building first-class equipment, following innovation for development, and being in accordance with customer service. It also provides the best solution, higher quality products and more valuable and efficient after-sales service for new and old customers.

#### Overview

KC Series of epoxy resin vacuum casting equipment is mainly used for dry-type transformers, dry-type casing, dry-type current transformers, dry-type transformers, high-voltage switch insulation, arc and other electrical products of epoxy resin casting production.

Our company has been committed to the pouring process, equipment research and development, technology in the domestic leading position. My company has an experienced design, manufacturing, installation, commissioning, trial production one of the technical team.

1. This series equipment used in electrical products with fillers and pouring;
2. This series equipment is suitable A Epoxy resins, UV-outdoor-type epoxy resin and polyurethane vacuum degassing, a combination of polymer materials and casting, for both foreign and domestic production of resin used.
3. This series of products can be used for user-filled hybrid and two-component mixed fillers, with great flexibility.
4. This series based on user demand, to increase or decrease the equipment system, modular Assembly option. Easy to install a high degree of automation and easy to master.

KC Series casting equipment are:

KCB Series standard vacuum casting equipment

KCY Series of standard vacuum pressure casting equipment

KCD Series of electronic measurement of vacuum pressure casting plant

KCJ Series of static mixing vacuum pressure casting plant

#### Main technical characteristics

1. By vacuum casting system, equipment, vacuum mixing system, two sets of electric heating system, two sets of condensing system, two independent vacuum system.
2. Using thin film degassing, mixing tank, inverter suitable for different viscosity of resin.
3. Filters, two sets of condensation is our independent research and development of double filtration filters effectively protect the vacuum pump.
4. Pouring cans of clean, energy-efficient heating systems, mixing bowl steady heat conduction oil heating system is adopted.
5. Analog screen + PLC Control, stable and reliable, and can be equipped with touch-screen system
6. And two sets of vacuum system on mixing bowl, pouring cans, independence air and high efficiency
