

KBY Standard Transformer Vacuum Drying Equipment 10 — 110KV 100000K 110-500KV

Our Product Introduction

for more products please visit us on jc-transformer.com

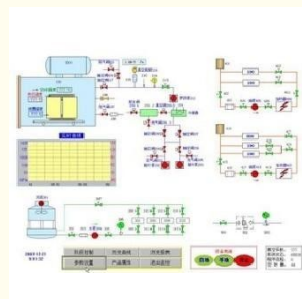

Basic Information

- Place of Origin: China
- Brand Name: JC
- Certification: SGS CE, UL
- Model Number: JC450
- Minimum Order Quantity: 1 pcs
- Price: consult
- Packaging Details: Export standard packaging
- Delivery Time: 5 days
- Payment Terms: L/C, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100pcs/month

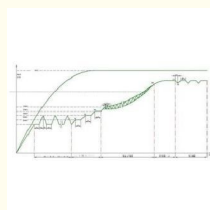

Product Specification

- Control Mode: Touch Screen
- Dryer Size Mm: 2400X3000
- Condenser: Horizontal 4m
- Vacuum Unit: 2X-70/ZJY-300
- Heating System: Heating Cable
- Cooling System: Chiller
- Open Method: Rotate
- Highlight: transformer vacuum drying equipment, KBY Standard transformer vacuum drying, vacuum drying transformer

Product Description

KBY Standard transformer vacuum drying equipment for 10 — 110KV Level, 100000KV Capacity of dry transformer 110-500KV

MY COMPANY:

My company is a high-tech private enterprise, it has a experienced term, which more than ten years engaged in research and development, design, manufacture and installation of vacuum equipment. Besides, it is not only committed to build high quality brand about vacuum equipment, but it also has products, which are widely used in impregnating, epoxy resin pouring, drying, and note oil processing in some industries (like metal heat treatment, transformer, and transformer device, reactor device, regulator device, high pressure electrical, motor, capacitor, switch and other similar industries). Relying on strong technical advantages and scale advantages, and it also dedicated itself to develop Vacuum application technology and relative vacuum equipment Main products are different kinds of vacuum casting equipments, vacuum drying equipment, vacuum impregnation equipment, vacuum oiling device equipment, and vacuum heat treatment equipment.

The most important of this company is product quality, and it strictly follows international quality certification system, implementation of quality policy about creating a Kerry brands, building first-class equipment, following innovation for development, and being in accordance with customer service. It also provides the best solution, higher quality products and more valuable and efficient after-sales service for new and old customers.

Our Product Introduction

Transformer vacuum drying equipment is improved on the basis of our company at home and abroad, and I am in the vacuum equipment design, manufacturing experience, user experience and developed, and the equipment is mainly used for oil-immersed transformers, transformers, capacitors, reactors, and other products of the body is dry, than conventional vacuum drying reduces drying time 40%--50%, is a reliable, energy-efficient technology and equipment equipment.

Scope of application: 10 — 110KV Level, 100000KV Capacity of dry transformer 110-500KV Voltage transformer coil dry

Transformation method of vacuum drying equipment for product heating, vacuum tank is dry evaporation of water vapor as a heat transfer medium, in the heater and the dry heat exchange products. This heating is similar to coal, oil and gas-phase dry heat. Heater uniformity is very good, high heating efficiency and reliability.

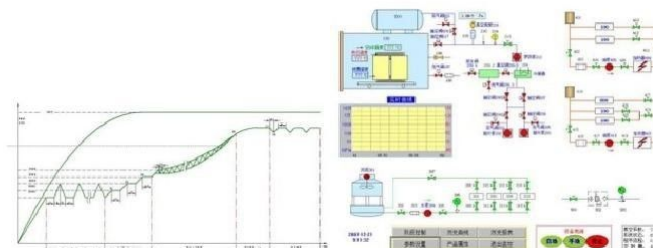

KB Transformer vacuum drying equipment is divided into

KBY Standard transformer vacuum drying equipment

KBB Variable voltage heating transformer vacuum drying equipment

KBII Gas oil pressure vacuum drying equipment

KBF Large transformer vacuum drying equipment

Wuxi Jiachen Power Electronics Equipment Co., Ltd.
