

Precision-Crafted APG Moulds For Consistent And Accurate Results

Our Product Introduction

for more products please visit us on jc-transformer.com

Basic Information

- Place of Origin: China
- Brand Name: JC
- Certification: SGS CE,UL
- Model Number: 888
- Minimum Order Quantity: 1 pcs
- Price: consult
- Packaging Details: Wooden
- Delivery Time: 5 days
- Payment Terms: T/T, Western Union, MoneyGram, D/P
- Supply Ability: 100pcs/month

Product Specification

- Heating Power: 12KW
- Hydraulic Power Pack: 5.5KW
- Horizontal Tilting Angle: 0-50 Degree
- Mould Load Weight: 2T
- Machine Weight: 4500KG
- Highlight: **Accurate APG Moulds,
Horizontal Tilting Angle APG Moulds,
Precision-Crafted APG Moulds**

Product Description

Product Description:

The machine features Servo HMI APG clamping, which ensures that the moulds are held firmly and securely during the casting process. This feature also ensures that the moulds are not damaged during the casting process, which helps to prolong their lifespan and reduce the need for frequent replacements.

The Epoxy Resin Machine also features a high-precision temperature control system, which ensures that the epoxy resin is heated to the optimal temperature for casting. This ensures that the castings are of high quality and free from defects such as bubbles and shrinkage. Another key feature of the Epoxy Resin Machine is its advanced mixing system. The machine is equipped with a high-speed mixing head that ensures that the epoxy resin is mixed thoroughly and evenly, which helps to ensure that the castings are of high quality and free from defects.

The machine is also designed to be easy to use and maintain. It features a user-friendly interface that makes it easy for operators to set up and operate the machine. The machine also features a self-cleaning system that helps to reduce downtime and maintenance costs.

The Epoxy Resin Machine is ideal for use in a wide range of industries, including electrical, automotive, and aerospace. It is a versatile and reliable piece of equipment that can be used to produce high-quality APG moulds for a wide range of applications.

In summary, the Epoxy Resin Machine is a state-of-the-art piece of equipment that is ideal for CT&PT winding machine manufacturers and other industries that require high-quality APG moulds. It features advanced features such as Servo HMI APG clamping, a high-precision temperature control system, and an advanced mixing system, all of which help to ensure that the castings are of high quality and free from defects. It is also easy to use and maintain, making it an ideal choice for busy production environments.

Our Product Introduction

Features:

Product Name: Epoxy Resin Machine
 Standard APG Clamping Machine
 Easy operation and maintenance
 Precise temperature control
 Uniform mixing of resin and hardener
 High-quality output with no air bubbles
 Various mold sizes and shapes can be used
 Efficient production process with short cycle time
 Automatic pressure and vacuum control
 Robust and durable design for long-lasting use

Technical Parameters:

Product Attribute	Description
Product Name	Epoxy Resin Machine
Machine Type	CT&PT Winding Machine
Clamping Method	Standard APG Clamping Machine
Other Name	APG Clamping Machine

Applications:

The JC-888 Epoxy Resin Machine is a high-quality product that is perfect for a variety of applications. This machine is designed to provide a consistent and reliable flow of epoxy resin for a range of different scenarios. Here are some of the key product application occasions and scenarios:

CT&PT Winding Machine: The JC-888 is an excellent choice for CT&PT winding machines. This product is designed to provide a consistent flow of resin, ensuring that the winding machine operates smoothly and efficiently. Additionally, the JC-888 is a durable and reliable machine that can handle the demands of a busy CT&PT winding operation.

Double-Station APG Clamping Machine: The JC-888 is also an ideal choice for double-station APG clamping machines. This product is designed to provide a precise and consistent flow of epoxy resin, ensuring that the clamping machine can operate at maximum efficiency. Additionally, the JC-888 is easy to use and maintain, making it a great choice for busy production environments.

Servo HMI APG Clamping: Another great application for the JC-888 is servo HMI APG clamping. This product is designed to provide a reliable and consistent flow of epoxy resin, ensuring that the clamping operation is smooth and efficient. Additionally, the JC-888 is a durable and reliable machine that can handle the demands of a busy production environment.

Overall, the JC-888 Epoxy Resin Machine is a versatile and reliable product that is perfect for a range of different scenarios. With its SGS, CE, and UL certifications, you can be confident that this machine meets the highest quality standards. Additionally, its place of origin is in China, and it has a minimum order quantity of just one piece. The price is available upon consultation, and we accept a variety of payment terms, including T/T, Western Union, MoneyGram, and D/P. The JC-888 has a supply ability of 100 pieces per month, and delivery time is just 5 days. The product is also packaged securely in a wooden box, ensuring that it arrives at your location in perfect condition.

Support and Services:

The Epoxy Resin Machine is a high-quality product designed to provide reliable and efficient service for all your resin needs. Our technical support team is available to assist you with any questions or concerns you may have regarding the operation, maintenance, or troubleshooting of your machine.

In addition, we offer a range of services to ensure that your machine is always running at peak performance. These services include regular maintenance and cleaning, repair and replacement of parts, and upgrades to the latest technology.

Our goal is to provide our customers with the highest level of support and service possible. If you have any questions or need assistance with your Epoxy Resin Machine, please don't hesitate to contact our technical support team.

Packing and Shipping:

Product Packaging:

The Epoxy Resin Machine will be packaged in a sturdy box made of corrugated cardboard to ensure safe delivery. Inside the box, the machine will be wrapped in bubble wrap to provide extra protection. The package will also include a user manual and all necessary tools and accessories.

Shipping:

The Epoxy Resin Machine will be shipped via a reputable courier service to ensure timely and safe delivery. Customers will receive a tracking number upon shipment so they can monitor the progress of their package. Shipping times may vary depending on the destination and the courier service used.

FAQ:

Q1: What is the brand name of the epoxy resin machine?

A1: The brand name of the machine is JC.

Q2: What is the model number of the epoxy resin machine?

A2: The model number of the machine is 888.

Q3: What certifications does the epoxy resin machine have?

A3: The machine has SGS, CE, and UL certifications.

Q4: What is the minimum order quantity for the epoxy resin machine?

A4: The minimum order quantity for the machine is 1 piece.

Q5: What payment terms are accepted for the epoxy resin machine?

A5: We accept T/T, Western Union, MoneyGram, and D/P as payment terms. Please consult us for the price.

Q6: What is the supply ability of the epoxy resin machine?

A6: The supply ability of the machine is 100 pieces per month.

Q7: What is the delivery time for the epoxy resin machine?

A7: The delivery time for the machine is 5 days.

Q8: What are the packaging details for the epoxy resin machine?

A8: The machine is packaged in a wooden box.
