

## Customizable Epoxy Resin Machine for Your Specific Requirements

### Our Product Introduction

#### Basic Information

- Place of Origin: China
- Brand Name: JC
- Certification: SGS CE,UL
- Model Number: 888
- Minimum Order Quantity: 1 pcs
- Price: consult
- Packaging Details: Wooden
- Delivery Time: 5 days
- Payment Terms: T/T, Western Union, MoneyGram, D/P
- Supply Ability: 100pcs/month

#### Product Specification

- Highlight: Customizable Epoxy Resin Machine, Personalized Epoxy Resin Machine

## Product Description

### Product Description:

One of the key features of this machine is its ability to perform CT&PT Winding. The CT&PT Winding Machine is used for winding the primary and secondary coils of current transformers and potential transformers. This process requires precision and accuracy, which the Epoxy Resin Machine can deliver. The machine is equipped with a programmable logic controller (PLC) that allows for precise winding control. This ensures that the coils are wound to the required specifications, and therefore, the transformer operates effectively without any hitches.

In addition to CT&PT winding, the Epoxy Resin Machine can also perform APG Clamping. The APG Clamping Machine is used to hold the winding assembly while the epoxy resin is being poured and cured. This ensures that the winding assembly is held tightly in place, preventing any movement that could lead to air bubbles or other defects in the final product. The clamping process is also automated, which ensures consistency and reduces the risk of human error.

The Epoxy Resin Machine is easy to operate and maintain. It is equipped with a touch screen interface that allows for easy programming and control of the machine's functions. The machine is also designed for easy cleaning and maintenance, which ensures that it operates at its best for longer periods. The machine is built with high-quality materials and components, which makes it durable and able to withstand the demands of a busy production environment.

Overall, the Epoxy Resin Machine is a must-have for companies in the electrical industry that are looking to improve their production efficiency and quality. With its ability to perform CT&PT Winding and APG Clamping, this machine is versatile and reliable, delivering consistent results. It is also easy to operate and maintain, which makes it an excellent investment for any company looking to improve its bottom line.

### Features:

Product Name: Epoxy Resin Machine

APG Clamping Machine

CT&PT Winding Machine

Servo HMI APG Clamping

### Technical Parameters:

Product Attribute	Description
Product Name	Epoxy Resin Machine
Machine Type	CT&PT Winding Machine, Double-Station APG Clamping Machine, Servo HMI APG Clamping
Power Input	AC 380V
Frequency	50/60Hz
Rated Power	20kW
Max Capacity	500kg
Control System	PLC
Operation Method	Manual/Automatic
Working Pressure	0-30MPa
Dimension	2100mm x 1500mm x 2100mm

### Applications:

The JC 888 Epoxy Resin Machine is a high-quality and efficient machine that is widely used in various industries. This machine is certified by SGS, CE, and UL, ensuring that it meets all necessary safety and quality standards. It is made in China and has a minimum order quantity of 1 piece. The price of this machine is available upon consultation, and it can be purchased using T/T, Western Union, MoneyGram, or D/P.

The JC 888 Epoxy Resin Machine is designed to handle various applications, making it versatile and practical. It is commonly used in the production of electrical components such as transformers, switchgear, and bushings. The machine's precision and accuracy make it ideal for creating high-quality electrical components that meet industry standards.

This machine is also suitable for use in the automotive industry, where it is used to create high-strength and durable parts. The JC 888 Epoxy Resin Machine is particularly useful in the production of engine parts, body panels, and other critical components. Its ability to create precise and detailed parts makes it an essential tool in any automotive manufacturing plant.

The JC 888 Epoxy Resin Machine is also ideal for use in the aerospace industry, where it is used to manufacture various parts and components. The machine's high level of accuracy and precision makes it ideal for creating complex and intricate parts that meet strict industry standards.

Another application of this machine is in the production of Double-Station APG Clamping Machine and APG Clamping Machine. The JC 888 Epoxy Resin Machine is capable of producing high-quality and efficient clamping machines for various industries. Its ability to produce Double-Station APG Clamping Machine makes it an essential tool for industrial manufacturing plants that require high-volume production of clamping machines.

Overall, the JC 888 Epoxy Resin Machine is a versatile and efficient machine that is suitable for various applications. It has a supply ability of 100 pieces per month and a delivery time of 5 days. The machine is packaged in wooden packaging to ensure its safety during

transport.

## Support and Services:

Our Epoxy Resin Machine product comes with comprehensive technical support and services to ensure smooth operation and maintenance. Our team of experienced technicians can provide on-site installation and training to guarantee proper setup and operation of the machine. Additionally, we offer remote technical support for any troubleshooting needs and can supply replacement parts and accessories as needed. Our commitment to customer satisfaction means that we are always available to answer any questions or concerns you may have about your Epoxy Resin Machine.

## Packing and Shipping:

Product Packaging:

The Epoxy Resin Machine will come in a sturdy cardboard box with foam inserts for protection during shipping.

All necessary components will be included in the box, such as the machine itself, mixing cups, stirring sticks, and instructions for use.

Shipping:

Orders will be processed within 24 hours of purchase.

Shipping will be via standard ground shipping.

Estimated delivery time is 5-7 business days within the continental United States.

For international orders, shipping times may vary depending on the destination and customs clearance procedures.

Customers will receive a tracking number once the order has shipped.

## FAQ:

Frequently Asked Questions

Q: What is the brand name of this product?

A: The brand name of this product is JC.

Q: What is the model number of this product?

A: The model number of this product is 888.

Q: What certifications does this product have?

A: This product is certified by SGS, CE, and UL.

Q: What is the minimum order quantity for this product?

A: The minimum order quantity for this product is 1 piece.

Q: What payment terms are available for this product?

A: We accept T/T, Western Union, MoneyGram, and D/P as payment terms.

Q: What is the delivery time for this product?

A: The delivery time for this product is 5 days.

Q: What is the packaging for this product?

A: The product is packaged in wooden packaging.

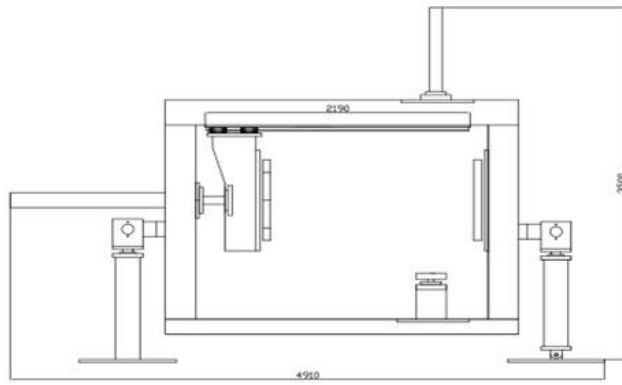

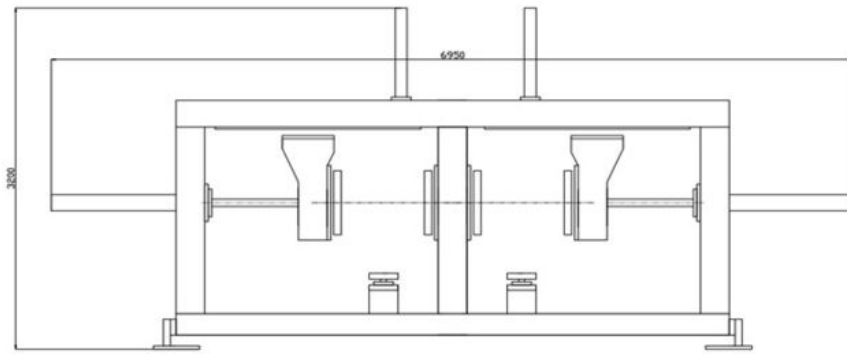

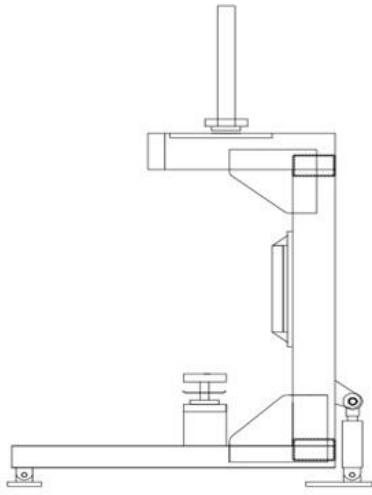

Q: What is the supply ability for this product?

A: The supply ability for this product is 100 pieces per month.

Q: How can I get the price for this product?

A: Please consult us directly for the price of this product.
