

250kN Clamping Force APG Process Machine For Professional And Durable Epoxy Resin Production

Our Product Introduction

for more products please visit us on jc-transformer.com

Basic Information

- Place of Origin: China
- Brand Name: JC
- Certification: SGS CE,UL
- Model Number: 888
- Minimum Order Quantity: 1 pcs
- Price: consult
- Packaging Details: Wooden
- Delivery Time: 5 days
- Payment Terms: T/T, Western Union, MoneyGram, D/P
- Supply Ability: 100pcs/month

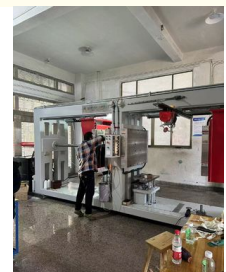

Product Specification

- Clamp Plate Size: :600*800mm
- Clamp Force: 210KN
- Min MAX Clamp Plate Stroke: 240*1250mm
- Upper&Lower Core Puller Stroke: 760*350mm
- Heating Power: 12KW
- Highlight: **250kN Clamping Force APG Process Machine, Professional Epoxy Resin Production Machine, Durable Epoxy Resin Production Machine**

Product Description

Upgrade Your Production Line With Our Advanced Standard APG Claming Mchine

Product Description:

The Epoxy Resin Machine is made up of different components including the APG Clamping Machine, the mixing system, the metering system, and the heating system. The APG Clamping Machine is the most important component of the machine as it is responsible for the molding and curing of the epoxy resin. The machine is available in different models including the Single-Station APG Clamping Machine, the Double-Station APG Clamping Machine, and the Four-Station APG Clamping Machine.

The Double-Station APG Clamping Machine is a popular choice for many manufacturers because it allows for the production of two products simultaneously. This means that the production capacity of the machine is doubled, which leads to increased efficiency and reduced production time. The Double-Station APG Clamping Machine is also more cost-effective than the Single-Station APG Clamping Machine because it produces more products in the same amount of time.

The mixing system of the Epoxy Resin Machine is responsible for the preparation of the epoxy resin. The system includes a mixer that mixes the epoxy resin with a hardener and other additives to produce a homogeneous mixture. The metering system is responsible for measuring the exact amount of epoxy resin required for each product. This ensures that the products are produced with consistent quality and reduces material waste.

The heating system of the Epoxy Resin Machine is responsible for heating the epoxy resin to the required temperature for curing. The system includes a heater that heats the epoxy resin to a temperature between 80°C and 120°C. The curing process takes between 30 minutes and 2 hours depending on the size and complexity of the product.

The Epoxy Resin Machine is very easy to operate and requires minimal maintenance. The machine is also very safe to use as it is equipped with safety features like emergency stop buttons, safety guards, and warning lights. The machine is also designed to be energy-efficient, which reduces energy costs.

In conclusion, the Epoxy Resin Machine is an essential machine for the production of high-quality epoxy resin products for the electrical industry. The machine is available in different models including the Double-Station APG Clamping Machine, which is a popular choice for many manufacturers. The machine is easy to operate, requires minimal maintenance, and is equipped with safety features for safe operation. The machine is also energy-efficient, which reduces energy costs and makes it a cost-effective solution for manufacturers.

Features:

Product Name: Epoxy Resin Machine
APG Clamping Machine
Double-Station APG Clamping Machine
CT&PT Winding Machine

Technical Parameters:

Product Attribute	Description
Product Name	APG Moulds
Machine Type	Double-Station APG Clamping Machine
Control System	Servo HMI APG Clamping

Applications:

Standard APG Clamping Machine

The JC 888 Epoxy Resin Machine is an ideal choice for those looking for a standard APG clamping machine. This machine is designed to provide a reliable and efficient way to produce all types of APG clamping products. It is a perfect choice for those who want to produce high-quality products with ease and efficiency.

Servo HMI APG Clamping

The JC 888 Epoxy Resin Machine is also an excellent choice for those looking for a servo HMI APG clamping machine. This machine is designed to provide a high level of precision and accuracy when producing APG clamping products. With its advanced technology and user-friendly interface, this machine is the perfect choice for those who want to produce high-quality products with ease and efficiency.

Standard APG Clamping Machine

The JC 888 Epoxy Resin Machine is perfect for a variety of application occasions and scenarios. It is an ideal choice for those who want to produce high-quality epoxy resin products with ease and efficiency. Whether you are looking for a standard APG clamping machine or a servo HMI APG clamping machine, the JC 888 Epoxy Resin Machine is the perfect choice.

The JC 888 Epoxy Resin Machine is certified by SGS, CE, and UL, ensuring that it meets the highest standards of quality and safety. It is manufactured in China and has a minimum order quantity of one piece. The price of the machine is available upon consultation, and the payment terms include T/T, Western Union, MoneyGram, and D/P. The machine has a supply ability of 100 pieces per month and a delivery time of five days. It is packaged in wooden crates to ensure that it arrives safely and in perfect condition.

Support and Services:

Our Epoxy Resin Machine product comes with comprehensive technical support and services to ensure that you have a smooth experience with our product. Our technical support team is available to assist you with any product-related questions or issues you may have. We also offer training and installation services to help you get started with the product.

In addition, we offer maintenance and repair services to keep your Epoxy Resin Machine running at optimal performance. Our team of experts is equipped to handle any repairs or maintenance tasks that may arise, ensuring that your product remains in good condition for as long as possible.

Finally, we offer upgrades and customization services to help you tailor your Epoxy Resin Machine to your specific needs. Whether you need additional features or modifications to the existing ones, our team can work with you to make the necessary changes.

Packing and Shipping:

Product Packaging:

One Epoxy Resin Machine

Two Mixing Cups

Two Stir Sticks

One User Manual

Shipping:

Ships within 2-3 business days

Free standard shipping in the US

International shipping available at an additional cost

FAQ:

Q: What is the brand name of the Epoxy Resin Machine?

A: The brand name is JC.

Q: What is the model number of the Epoxy Resin Machine?

A: The model number is 888.

Q: What certifications does the Epoxy Resin Machine have?

A: The Epoxy Resin Machine is certified by SGS, CE, and UL.

Q: Where is the Epoxy Resin Machine made?

A: The Epoxy Resin Machine is made in China.

Q: What is the minimum order quantity for the Epoxy Resin Machine?

A: The minimum order quantity is 1 pcs.

Q: What payment methods are accepted for the Epoxy Resin Machine?

A: We accept T/T, Western Union, MoneyGram, and D/P.

Q: What is the supply ability for the Epoxy Resin Machine?

A: The supply ability is 100pcs/month.

Q: What is the delivery time for the Epoxy Resin Machine?

A: The delivery time is 5 days.

Q: How is the Epoxy Resin Machine packaged for delivery?

A: The Epoxy Resin Machine is packaged in wooden boxes.

Q: How much does the Epoxy Resin Machine cost?

A: Please consult us for pricing information.
