

DHQZ-3000 Transformer Winding Machine with HS Code 847981100 Suitable for 50KVA-630KVA Amorphous Coil Winding

Our Product Introduction

for more products please visit us on jc-transformer.com

Basic Information

- Minimum Order Quantity: 1
- Price: 3000

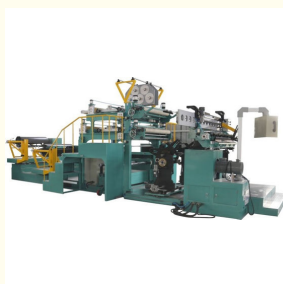

Product Specification

- Model NO.: DHQZ-3000
- Outer Diameter: < 600mm
- Axial Height: <800mm
- Coil Form: Circular, Oblong, Elliptical, Rectangular
- Wire Specification: Enameled Wire
- Dimensions: 900*900*900
- Production Capacity: 60000PCS/Year
- Control System: PLC And Servo Motor
- Transformer Capacity: 50KVA-630KVA
- Coil Type: Low-voltage Foil, High-voltage
- Automation Level: High
- Material Compatibility: Amorphous, Silicon Steel
- Transport Package: Wooden
- HS Code: 847981100
- Model/Parameter: Jc-800

Product Description

Dhqz-3000 Amorphous Body Assembly Stand

Product Overview

The DHQZ-3000 is an automatic, intelligent multi-function winding system specifically designed for winding core coils of amorphous (silicon steel) triangular coiling core transformers. This advanced equipment is suitable for 50KVA-630KVA amorphous transformer production, including both low-voltage foil coils and high-voltage coils.

Key Features

- Specialized for amorphous (silicon steel) triangular coil core transformers
- Handles both low-voltage foil coils and high-voltage coil production
- PLC and servo motor control system for high automation
- Ideal for winding production of amorphous high-voltage coils
- Versatile application for circular, elliptical, oblong, and rectangular power transformers

Technical Specifications

Application	50KVA-630KVA amorphous triangular coil core transformers
Control System	PLC with servo motor system
Winding Capability	Circular, elliptical, oblong, and rectangular shapes
Compatible Materials	Amorphous alloys, silicon steel

Company Profile

Our company specializes in transformer production equipment for the new energy sector, holding 115 invention patents, utility model patents, and software copyrights. Our product range includes foil winding machines, automatic high pressure winding machines, triangular three-dimensional core winding systems, and specialized equipment for amorphous material processing.
