

DHR-1T Series Automatic Winding Machine with 900x900x900 Specification and 60000PCS/Year Production Capacity for High and Low Pressure Coils

Our Product Introduction

for more products please visit us on jc-transformer.com

Basic Information

- Minimum Order Quantity: 1
- Price: 3000

Product Specification

- Model NO.: DHR- 1T
- Outer Diameter: < 600mm
- Axial Height: <800mm
- Coil Form: Circular, Oblong, Elliptical, Rectangular
- Wire Specification: Enameled Wire
- Dimensions: 900*900*900
- Production Capacity: 60000PCS/Year
- Transformer Capacity: 50KVA-630KVA
- Control System: PLC And Servo Motor
- Wire Coil Diameter: < 600mm
- Coil Height: <800mm
- Machine Type: Automatic Winding
- Suitable Core: Amorphous, Silicon Steel
- Winding Type: High And Low Pressure
- Automation Level: High

Product Description

DHR-1T Series High and Low Pressure Winding Machine

Product Description

This automatic, intelligent multi-function winding machine is specially designed for winding core coils of amorphous (silicon steel) triangular coiling core transformers. Suitable for 50KVA-630KVA amorphous (silicon steel) triangular coil core transformer production, including both low-voltage foil coils and high-voltage coils.

Company Profile

Our company specializes in transformer production equipment for new energy applications, including:

- Foil winding machines
- Automatic high pressure winding machines
- Triangular three-dimensional core foil winding machines
- Amorphous triangular three-dimensional core high and low pressure integrated automatic winding machines
- Triangular three-dimensional coiling core (silicon steel, amorphous) slitting and winding machines

We hold 115 invention patents, utility model patents, and software copyrights.

Applications

This equipment is suitable for winding various transformer coil shapes including:

- Circular
- Elliptical
- Oblong
- Rectangular power transformers, transformers, and reactances

Control System

The device features a PLC and servo motor control system, offering high automation levels and exceptional suitability for amorphous high-voltage coil winding production.
