

Automatic Transformer Winding Machine with Outer Diameter < 600mm Axial Height < 800mm and 3 Years After-sales Service

Our Product Introduction

for more products please visit us on jc-transformer.com

Basic Information

- Minimum Order Quantity: 1
- Price: 3000

Product Specification

- Model NO.: DHR-1T/2T
- Outer Diameter: < 600mm
- Axial Height: < 800mm
- Coil Form: Circular, Oblong, Elliptical, Rectangular
- Wire Specification: Enameled Wire
- Dimensions: 900*900*900
- Production Capacity: 60000PCS/Year
- Control System: PLC And Servo Motor
- Transformer Capacity: 50KVA-630KVA
- Core Type: Amorphous (silicon Steel) Triangular Coiling Core
- Coil Type: Low-voltage Foil Coil, High-voltage Coil
- Automation Level: High
- Suitable Transformers: Power Transformers, Transformers, Reactances

Max Coil Diameter: 600mm

Product Description

DHR-1T/2T Series High and Low Pressure Winding Machine

Product Description

This automatic, intelligent multi-function winding machine is specially designed for winding core coils of amorphous (silicon steel) triangular coiling core transformers. Suitable for 50KVA-630KVA amorphous (silicon steel) triangular coil core transformer production, including both low-voltage foil coils and high-voltage coils.

Company Profile

Our company specializes in transformer production equipment for new energy applications, including:

- Foil winding machines
- Automatic high pressure winding machines
- Triangular three-dimensional core foil winding machines
- Amorphous triangular three-dimensional core high/low pressure integrated automatic winding machines
- Triangular three-dimensional coiling core (silicon steel, amorphous) slitting and winding machines

115 patents including invention patents, utility model patents, and software copyrights.

Applications

This equipment is suitable for winding various transformer types including:

- Circular
- Elliptical
- Oblong
- Rectangular power transformers, transformers, and reactances

Control System

Features a PLC and servo motor control system for high automation levels, particularly effective for amorphous high-voltage coil winding production.
